Backstory + Mission

Our generation understands that the climate crisis is one of the most important issues facing society today. And, amidst a world seemingly on pause due to COVID-19, we've had an unparalleled opportunity to witness the direct impacts of our havoc-wreaking practices. With cleaner air, brighter skies, and lower earth vibrations than we've even thought possible, the Earth is showing us how together, we have the power to write a new climate story.

Today, we have an opportunity– a responsibility– to build an alternate future for ourselves. To lead our culture into a healthy, collaborative planet– one that is beneficial for all. To come together to figure out how WE can utilize our skill-sets.

Shift our culture, shift the climate.
